

CAPABILITY STATEMENT

MAXIMIZING BUSINESS THROUGH TECHNOLOGY

COMPANY OVERVIEW

Fortuna Business Management Consulting (BMC) is a proven leader in Cyber Security, with the knowledge, experience and resources, to successfully identify, analyze and mitigate risk, and compliance threats for both public and private sector clients. Our management and consulting staffs are professionals with skillsets that come from multi-faceted consulting engagements and industry recognized certifications. Fortuna BMC has set high standards for business ethics, performance and quality of deliverables to support program and company goals by applying industry specific expertise and process management to deliver solutions on time and on budget.

Fortuna BMC is a Historically Underutilized Business Zone (HUBZone) and a Service-Disabled Veteran-Owned Small Business (SDVOSB) certified with the federal government. We are also a Veteran-Friendly Business Enterprise (VBE) certified in Ohio, a Disabled Veteran Business Enterprise (DVBE) certified in all Los Angeles entities, and a certified Service-Disabled Veteran-Owned Business (SDVOB) in New York.

PAST PERFORMANCE

MAXIMIZING BUSINESS THROUGH TECHNOLOGY

- Developed and implemented the strategic plan, processes and methodology for a new information security Governance, Risk and Compliance program for a vertically integrated, international insurance and direct sales company, including design of a standards-based risk and control framework, governance, policies, methods, standards, security awareness and training, processes, and reporting.
- Delivered IT Security Rollout in hospitals and mobile communications as well as architected their 5-year project improvement roadmap for a not-for-profit medical organization and integrated health delivery system.
- Provided contract services to administer the Privacy Office for a State of California medical insurance program, ensuring adherence to Privacy Office provisions, including overseeing the establishment, implementation and adherence to policies on patient privacy, confidentiality and release of patient information; developing, conducting and reporting privacy risk assessments and internal privacy audits; overseeing the development and delivery of privacy training and awareness.
- Developed and implemented a Disaster Recovery and Business Continuity strategy and program for a multi-agency consortium of Public Safety agencies, including integration with state and local infrastructure and Integrated Justice Information Systems (IJIS).
- Provided contract services to implement Information Security projects for one of the largest health care providers in the United States. Provided a team that developed and implemented a comprehensive information security strategy across a five-region enterprise. This included managing projects as well as identifying upcoming security initiatives and communicating with C-Suite on security related processes.
- Took over various projects providing help desk, configuration support, IT consulting, project management, custom software development, data engineering and on-demand staffing for one of the largest multi-national professional services network in the world.
